DEPARTMENT OF GENETICS

May 21, 1952

Dear Luca:

I apologize for having delayed so long. This package has the following
E. coli:

58, 679, W-1305, W-1678 per previous description

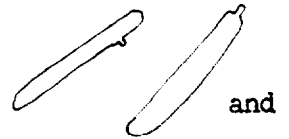

W-1258A (= a "prototroph" from your NTCC 123)

W-1930 and W-1937 are diauxotrophs from the above.

W-1982 is a non-lysogenic 58-161, also sent to Hayes.

In a few slides of HfrX I have seen many cells look like:
occasionally pairs like  .

????Conjugation.

and

Sincerely,

Joshua
